

All specifications (I2490VXQ/BT)

I2490VXQ/BT

The AOC I2490VXQ from AOC's 90 series (Pro-line) brings an appealing design and functionality together for business users and prosumers. Its 23.8-inch IPS panel produces crisp, vivid imagery in Full HD resolution, offering viewing angles of up to 178°. The 90% NTSC and 100% sRGB gamut coverage is accompanied with an accurate colour reproduction and good colour uniformity, delivering the needs of photo/video editors. Its HDMI, DisplayPort and VGA inputs offer a variety of connection options. Users spending long hours in front of a monitor will be relieved with the Flicker-Free technology reducing flicker by regulating backlight with a DC system, and the Low Blue Light mode reducing the harmful short wavelength blue light. The energy-efficient I2490VXQ is also certified with ecolabels such as Energy Star, EPEAT and TCO. It is equipped with an Off Timer powering the monitor down after a specified time, and an Eco-mode which adapts the screen to various types of content (Text / Internet / Game / Movie / Sport) to reduce energy consumption. The I2490VXQ reminds us that professional office monitors can be elegant as well.
